Hydrographical Jobs

Introduction

HydrographicalJobs is the first Hydrographic Survey Career Portal in the world and was launched in 2009. Our highly targeted Survey Career Portal is dedicated exclusively to Onshore and Offshore Survey Professionals in the Hydrographic Survey Industry.

By specialising in this market, we provide you with access to a motivated group of Professional (freelance) Candidates from all over the world and at all stages of their careers.

HydrographicalJobs attract a higher concentration of qualified job seekers than generalist job boards because generalist sites are difficult to navigate and specific career opportunities are clustered in more general categories, requiring job seekers to search through hundreds of irrelevant jobs to find relevant flexible employment career opportunities.

At HydrographicalJobs we believe in value and professionalism. To that end you will find our approach refreshing, our results impressive and our prices cost effective.

Hydrographical Jobs

Hydrographical Jobs

General information

Job upload / advertising

Easy to get started and it is all done online. We provide you with an easy to use system for posting jobs using a browser based administration tool and user defined templates. Post and manage multiple jobs and determine return on investment by analysing views and responses. Manage your job postings in a user friendly interface.

Course upload / advertising

Easy to get started and it is all done online. We provide you with an easy to use system for posting courses and projects using a browser based administration tool and user defined templates.

Employer profile

Post an Employer profile to reinforce company branding. All job advertisements include your company profile which includes website URL, and your available positions.

Employer of choice

Let candidates know that you are an Employer of Choice with a prominent home page listing with company logo, available positions and a link back to your website.

Hydrographical Jobs

Logo

Upload your logo to personalise your job advertising with logo insertions featured on all job advertisements.

Candidate email alerts

Create Candidate email alerts based on function, keywords, jobs or country. The candidate receive an email alert notification when a job matches his search criteria. Change and modify your alerts and criteria at any time.

Candidate tracking system | candidate management

Stay organised and increase your efficiency. Employers at HydrographicalJobs have an advanced candidate management solution at their disposal. Applicants can be screened and marked that represent their application status in the recruitment process "Viewed, Rejected, Accepted" This application management solution enables you to keep track of your applicants throughout the recruitment cycle.

Cross promotion of your job advertising | job aggregation

To maximise your Candidate Pool when you post a new job on HydrographicalJobs , your job advertisement will be automatically integrated with other job aggregator sites. This increases your visibility and gains a huge exposure for your job listings. This acts as a great marketing tool to drive targeted job seekers to your job advertisement.
